

Jaime Ramsden de Frutos

Junior SOC / Blue Team candidate | CTI and automation | Cloud foundations

Menorca, Spain | English / Spanish / Catalan | Remote / hybrid Spain and EU; UK eligible

jrf91@pm.me | jimblogic.github.io | github.com/JimBLogic

PROFILE

Seeking my first professional SOC / Blue Team role. I combine administration, customer operations and practical IT support with public defensive projects and guided cybersecurity training. My focus is source-backed vulnerability intelligence, Linux and containers, reproducibility, troubleshooting, trust boundaries and clear technical documentation. Project and lab experience is not presented as paid SOC employment.

ORIGINAL PROJECTS / PROOF OF WORK

- **CyberDailyLog - flagship defensive project.** Python automation using CISA KEV, NVD and FIRST EPSS; stateful CVE tracking, state transitions, correlation and prioritisation. Public reports, source-health checks, explicit degradation and publication SLO records. A CTI learning project, not a SIEM or enterprise SOC service. Repository and evidence.
- **Defensive Homelab.** Reproducible Raspberry Pi 4 baseline with LITE / FULL Docker configurations, service-health tooling and documented trust boundaries. Deployment-ready baseline; operational validation in progress. Next evidence: service health, authentication triage, Windows/Sysmon or equivalent telemetry, a SIEM query, sanitised incident note and detection tuning. These exercises are pending. Repository.
- **Austrian Business Cycle Monitor.** Educational macro-data project with source provenance, freshness and failure states; not investment advice. Repository.
- **Portfolio.** EN/ES/CA content, privacy controls, security headers, route validation and GitHub Pages / Sites delivery. Source and CI.

AWS LEARNING STATUS

AWS AI Practitioner (AIF-C01): preparation and first exam attempt completed on 29 September 2026; continuing targeted study before a future retake. AWS Cloud Practitioner (CLF-C02): preparing. Neither certification has been earned. AWS SimuLearn / Skill Builder badges are training evidence, not professional AWS certification.

Experience and supporting learning

PROFESSIONAL BACKGROUND - OUTSIDE SOC

- **Administration and practical IT support - property operations, Menorca (2026).**

Administrative workflows, supplier coordination, sensitive records, everyday systems troubleshooting, written follow-up and escalation.

- **Administrative / IT support - Azulona (2025).** Booking administration, invoicing, customer support and everyday software troubleshooting.

- **Customer operations - Jet2.com (2023-2025).** Time-sensitive passenger support, accurate information, multilingual communication and escalation.

- **Auxiliary services - UTE Masa-Sagital (2022-2023).** Support for passengers needing assistance in an airport environment.

- **Previous senior residential support - United Kingdom.** People support, confidential records, shift handovers and coordination. This was a care-services role, not cybersecurity incident response.

LEARNING / GUIDED LABS

TryHackMe, Security Blue Team and Splunk / Hack The Box learning exercises support junior foundations in log analysis, network analysis, OSINT, forensics and incident-handling discipline. Public profile: tryhackme.com/p/JimBLogic. Rankings and room counts are not treated as permanent credentials.

SELECTED TRAINING & CREDENTIALS

- UpgradeHub: Cybersecurity, Ethical Hacking & Cloud bootcamp, 350 hours (2024).
- Security Blue Team: Blue Team Junior Analyst Pathway and introductory defensive courses.
- Cisco: Cyber Threat Management and Introduction to Cybersecurity; arcX: Threat Intelligence Foundation.
- Cybrary, IBM and AWS Skill Builder: supporting cybersecurity, Python and cloud learning records. Verify individual records at jimblogic.github.io/certifications.

FORKS / UPSTREAM EXPERIMENTS

Third-party repositories and upstream experiments are separate from my original projects. Fork ownership alone does not establish a contribution; review the upstream and commit history.

EDUCATION & LANGUAGES

Sports Science academic background, Universitat Ramon Llull; Advanced Technician in Physical and Sports Activities, IES Cap de Llevant. English and Spanish: native; Catalan: professional (Level C).
